BVPI 91a – Percentage of households resident in the authority's area served by kerbside collection of recyclables

What the indicator measures:

$$\frac{\textbf{Numerator: Number of households receiving a kerbside collection of recyclables}}{\textbf{Denominator: Total number of households in the Authority area}} \times 100$$

How the numerator and denominator are calculated using WasteDataFlow is summarised below setting out the questions data are drawn from.

Numerator

1. Total number of households receiving a kerbside collection (sum of entries in Q7 reported in Quarter 4).	Includes collections from blocks of flats & estates where recycling bins are provided specifically for the block of flats. Includes collection of green waste for composting where a charge is made.

Denominator

1. Dwelling stock in authority area from Q2	Data are from the Valuation Office's Schedule of Alterations. Figures as at the end of the financial year will be used and updated when available during the Quarter 4 reporting period.
