

# WasteDataFlow

Please find enclosed updated pages for your WasteDataFlow guidance manual. The guidance manual contains new information on a number of areas of WasteDataFlow, including producing reports and the authorisation process. All the sections of the manual have been updated to reflect modifications to the WasteDataFlow system and to provide additional clarity where required.

The updated version follows the same structure as previous, please keep the dividers and replace all other pages with the enclosed update.

May we take this opportunity to remind all authorities of the importance making timely returns to the WasteDataFlow system. A reminder of deadlines for the different countries is detailed below:

- England 3 months after end of quarter
- Wales 30 days after end of quarter
- Northern Ireland 2 months after end of quarter
- Scotland 42 days after end of quarter

Please contact the WasteDataFlow helpdesk on 0161 874 3602 if you require any further information.
