ENGLAND TOTAL			4,568,943	7,459,998

Notes on the forecast

1. The forecast takes into account seasonal variations in BMW and is profiled for each individual authority based on 2011/12 data. The estimate is calculated using the proportion of BMW the authority landfilled at the same period last year of its year total. This proportion is then multiplied by the actual amount of BMW landfilled in the current year to date to give a forecast of the annual amount likely to be landfilled.

We are only able to provide a forecast for those authorities that have provided accurate, timely and validated data. If there is no estimate for an individual authority this is because validated data was not available when the forecast was being compiled.
