Kpi (h) – Total household waste collected per household

What the indicator measures:

Numerator **Total tonnage of household waste arisings**

Denominator **Total number of households in authority area**

How the numerator and denominator are calculated using WasteDataFlow is summarised below setting out the questions data are drawn from.

Numerator

1. Total tonnage of household waste collected for recycling from Q10, Q12, Q16, Q17, Q18 (household waste column), Q33 and Q34	Excludes rubble. Material rejected is not deducted as this is part of the total household waste arisings.
+	
2. Total tonnage of residual household waste from Q23	All collected household residual waste.

Denominator

Population in authority area from Q1	Information is based on Census 2011 households plus new house starts from January 2011.
