

Kpi (j) – Total Local Authority Collected Municipal Waste Arisings

What the indicator measures:

The total tonnage of local authority collected municipal waste arisings

How the kpi is calculated using WasteDataFlow is summarised below setting out the questions data is drawn from.

1. Total tonnage of local authority collected municipal waste collected for recycling and re-use from Q10, Q11, Q12, Q16, Q17, Q18, Q33 and Q34.

Material rejected is not deducted as this is part of the total local authority collected municipal waste arisings.

+

2. Total tonnage of residual waste from Q23

All local authority collected municipal waste collected for disposal
