

## Kpi (n) – Percentage growth rate in Local Authority Collected Municipal Waste arisings

### What the indicator measures:

$$\text{Numerator} \quad \frac{(\text{Total tonnage of Local Authority Collected Municipal Waste arisings in the current year} - \text{that same amount from the previous year})}{\text{Denominator} \quad \text{Total tonnage of Local Authority Collected Municipal Waste arisings in previous year}} \times 100$$

How the numerator and denominator are calculated using WasteDataFlow is summarised below setting out the questions data are drawn from.

### Numerator:

#### Total tonnage of local authority collected municipal waste arisings in current year:

1. Total tonnage of Local Authority Collected Municipal Waste collected for recycling and re-use from Q10, Q11, Q12, Q16, Q17, Q18, Q33, and Q34

Material rejected is not deducted as this is part of the total Local Authority Collected Municipal Waste arisings.

+

2. Total tonnage of residual waste from Q23

All Local Authority Collected Municipal Waste collected for disposal and treatment.

—

#### Total tonnage of local authority collected municipal waste arisings in previous year:

3. Total tonnage of Local Authority Collected Municipal Waste collected for recycling and re-use from Q10, Q11, Q12, Q16, Q17, Q18, Q33, and Q34

Material rejected is not deducted as this is part of the total Local Authority Collected Municipal Waste arisings.

+

4. Total tonnage of residual waste from Q23

All Local Authority Collected Municipal Waste collected for disposal and treatment.

**Denominator:*****Total tonnage of local authority collected municipal waste arisings in previous year:***
