

WMT/007 - The percentage of municipal waste received at a household waste amenity site that is reused, recycled or composted.

What the indicator measures: (I)

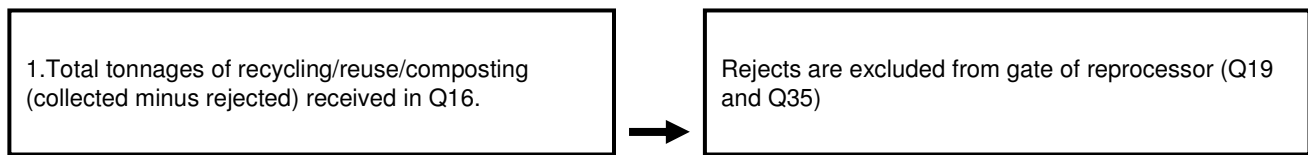

$$\frac{\text{Numerator}}{\text{Denominator}} \times 100$$

Numerator Total tonnage of municipal waste received for recycling/reuse/composting

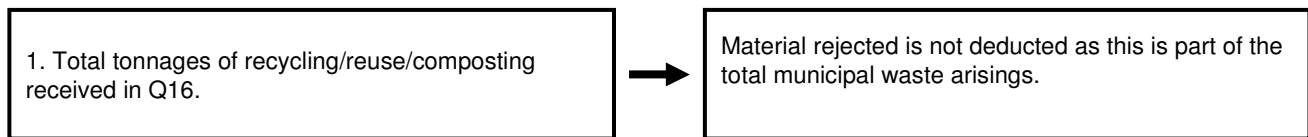

Denominator Total tonnage of municipal arisings received at site

How the numerator and denominator are calculated using WasteDataFlow is summarised below setting out the questions data is drawn from.

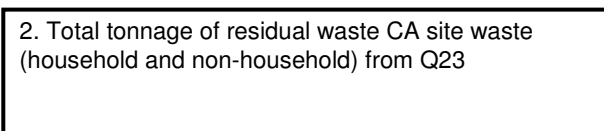

Numerator (i)

Denominator

+

PLEASE NOTE

This calculations does not take into account any residual waste recorded in Q23 on WDF that is subsequently sent for recycling/reuse*.

If this affects your recycling/reuse/compost results for your CA sites, please make a note in Q64 comment box and inform EAW MAR team (Caroline Hawkins) and/or WAG Waste Strategy Branch (Abigail Foster) with the following information:

- (a) Tonnage of material recycled from residual MRF (QQ64) that is attributable to CA site collection (from Q23, not Q16).
- (b) What evidence you have of this.

WAG will ensure that your indicator reflects any effort of recycling CA waste via a residual MRF. A procedure will be agreed with LGDU and circulated to authorities in Wales.

**This problem has been raised with the operational group.*
